1 Introduction

The Report

This report is an expert witness digital forensics report that was commissioned to investigate a possible conspiracy involving Tracy, who was a supervisor at the National Art Gallery in Washington DC. The case under investigation is that Tracy had participated in a scheme to rob valuable stamp collections on exhibition in the Gallery, and that she had assisted in a separate scheme to vandalize foreign art. The main aim of this report is to analyse digital evidence found in the external hard drive of Tracy and provide the findings in a way that can be used in legal proceedings.

An external hard drive of Tracy (tracy-external-2012-07-16-final).E01) was provided to the investigator. Autopsy forensic software was used to analyse the image. The findings included in this report are only made based on evidence obtained through that forensic image.

Background Information

The case of the National Art Gallery is the result of a series of criminal conspiracies. Alex, a Krasnovian supporter, attempted to humiliate the United States by staging the defacement of foreign art on exhibition at the National Gallery. He enlisted the help of Carry, a Krasnovian supporter who had contacts in the US, to help in the entry of Krasnovian militants into the museum. In its turn, Carry contacted Tracy, a Gallery supervisor and an acquaintance, pretending to organise a flash mob, and offered Tracy money in exchange of the information about security schedules and gallery layouts. Tracy had been communicating separately with her brother Pat about the theft of valuable stamp collections out of the Gallery. Her former husband Joe had already placed a key-logger on her computer. After Joe found out about the stamp theft conspiracy, he reported it to the police, who in turn revealed the theft scheme and the relationship between Tracy and Carry, resulting in the confiscation of Carry devices and the discovery of the defacement scheme.

The forensic examination is based on the external hard drive used by Tracy in order to find evidence of these conspiracies.

ACPO Principles

The Association of Chief Police Officers (ACPO) Good Practice Guide on Digital Evidence establishes four main principles to be used in the management of digital evidence during forensic investigations. The following principles were used in this investigation:

Principle 1 “No action taken by law enforcement agencies, persons employed within those agencies or their agents should change data which may subsequently be relied upon in court” (Horsman, 2020). The examiner complied by working solely on a forensic image of the hard drive belonging to Tracy. The MD5 hash value was noted before the examination and confirmed at its end, showing that no changes were made.

Principle 2 states that in circumstances where a person finds it necessary to access original data, that person must be competent to do so and be able to give evidence explaining the relevance and the implications of their actions (Horsman, 2020). This rule was not applied, since the entire investigation was done on the forensic image.

Principle 3 states that an audit trail of every process should be developed and maintained so that it can be replicated by an independent party (Horsman, 2020). Every step in Autopsy was recorded and is captured in this report to enable reproducibility.

Principle 4 is that the overall responsibility of the lead investigator is to ensure that the law and these principles are adhered to (Horsman, 2020). The forensic examiner who is referred to in this report accepts that responsibility.

2 Investigation

Items Analysed

The given forensic image was to be examined:

- tracy-external-2012-07-16-final.E01

The investigator is dependent on the integrity of the given image and does not claim the responsibility of the original imaging.

Authorisation

The police investigation into the alleged conspiracies described in the background of this report provided authority to investigate the forensic image of the external hard drive belonging to Tracy.

Preservation of Evidence

To guarantee the integrity of the forensic evidence, the MD5 hash value of the image file was noted at the beginning of the investigation. This hash was re-verified at the end of the examination to ensure that the image was not modified during the examination. The forensic image, rather than the original device, was analysed in adherence to ACPO Principle 1.

Software Used

Type	Software
Operating System	Microsoft Windows
Forensic Analysis	Autopsy (latest available version)

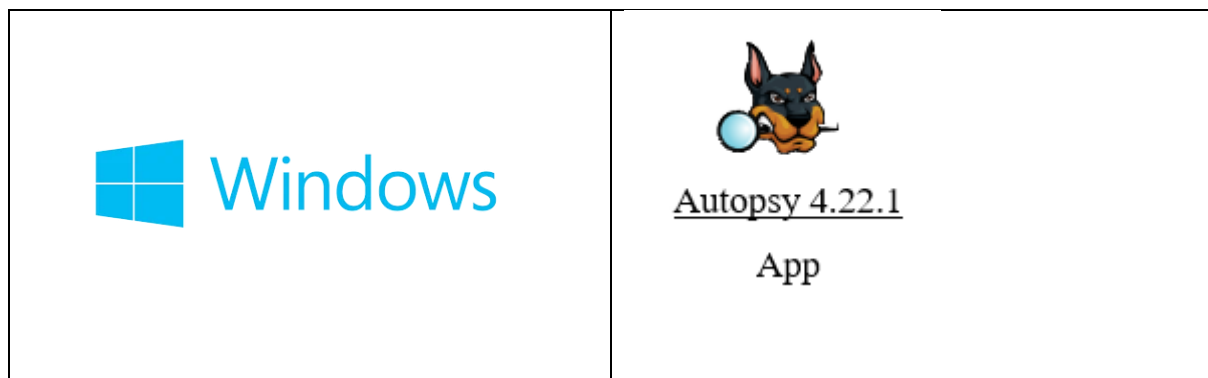

Figure 1: Software tools used during the investigations

Examination Process

The forensic image was loaded into Autopsy with all suggested ingest modules activated to

provide a thorough analysis. The areas that were specifically targeted to be examined included:

- Email communications between Tracy and other persons of interest
- Web search history and browser activity
- Insurance and security-related documents
- Encrypted or compressed files
- Timeline of events based on file metadata and communication timestamps

3 Findings

Web Search Activity

A web search artefact was obtained from the forensic image dated 5 July 2012 at 21:43. This search query is shown in Figure 2 with term 'the value of international stamps'. This discovery is important because it proves that Tracy was actively researching the monetary worth of stamps in the time frame of the conspiracy. This is in line with her plot to steal the stamp collections of the National Gallery which were supposed to be of high value.

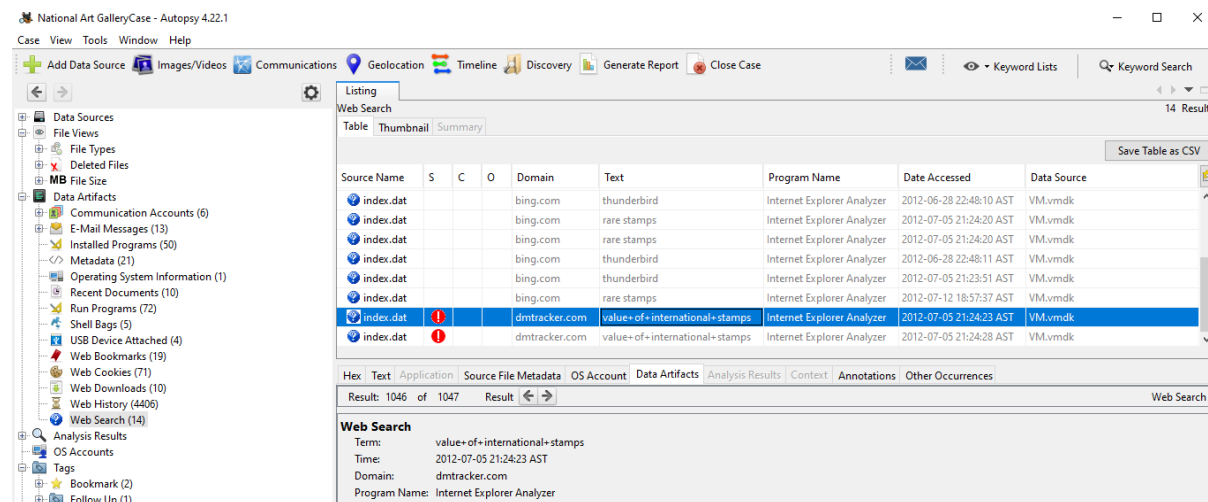

Figure 2: Web Search

Security Rotation Schedule

'Security Rotation Schedule' (security rotation.pdf) document depicted in Figure 3 was recovered from the image. This document outlined the schedule of duty of security personnel in the National Gallery and contained the following information:

- Shift A1 and A2: Monday to Friday, 06:00 to 15:00
- Shift B1 and B2: Wednesday to Sunday, 06:00 to 15:00
- Shift C: Monday to Friday, 15:00 to 21:00
- Shift D: Wednesday to Sunday, 15:00 to 21:00
- Support Shifts 1 and 2: Relieving primary shifts during lunch hours (12:00 to 14:15)

NATIONAL GALLERY DC
WASHINGTON

Security Personnel Duty Schedule:

Shift A1 and A2 Personnel: In designated positions as of 6:00 AM till 3:00 PM F-T except for designated relief time or specific authorization via issued communication channels.

Shift B1 and B2 Personnel: In designated positions as of 6:00 AM till 3:00 PM W-SU except for designated relief times or specific authorization via issued communication channels.

Shift C Personnel: In designated positions as of 3:00 PM till 9:00 PM M-F except for designated relief time or specific authorization via issued communication channels.

Shift D Personnel: In designated positions as of 6:00 PM till 9:00 PM W-SU except for designated relief times or specific authorization via issued communication channels.

Support shift 1 Personnel: Relieve Shift A1 from 12:00 PM to 1:00 PM, Relieve Shift A2 from 1:15 pm to 2:15 PM

Support shift 2 Personnel: Relieve Shift B1 from 12:00 PM to 1:00 PM, Relieve Shift B2 from 1:15 pm to 2:15 PM

Office of Personnel Management

Figure 3: Recovered Security Rotation PDF

Tracy would have been entitled to have access to such documents as part of her work as a Gallery supervisor, but the fact that this document was stored on a personal external hard drive, along with the rest of the evidence found, is a strong indication that the document was retention to support either the theft of the stamps or the artwork defacement scheme. The information regarding the security shift patterns and relief times would be crucial in planning the unauthorised access to restricted areas of the Gallery.

Encrypted Archive Containing Insurance Documents

An encrypted ZIP file 'document' was recovered as shown in Figure 4. This archive was as discovered to have three PDF files, stamp insurance document 1.pdf, stamp insurance document 2.pdf and stamp insurance document 3.pdf. The encryption of these documents shows that there was an intention to hide the contents of these documents.

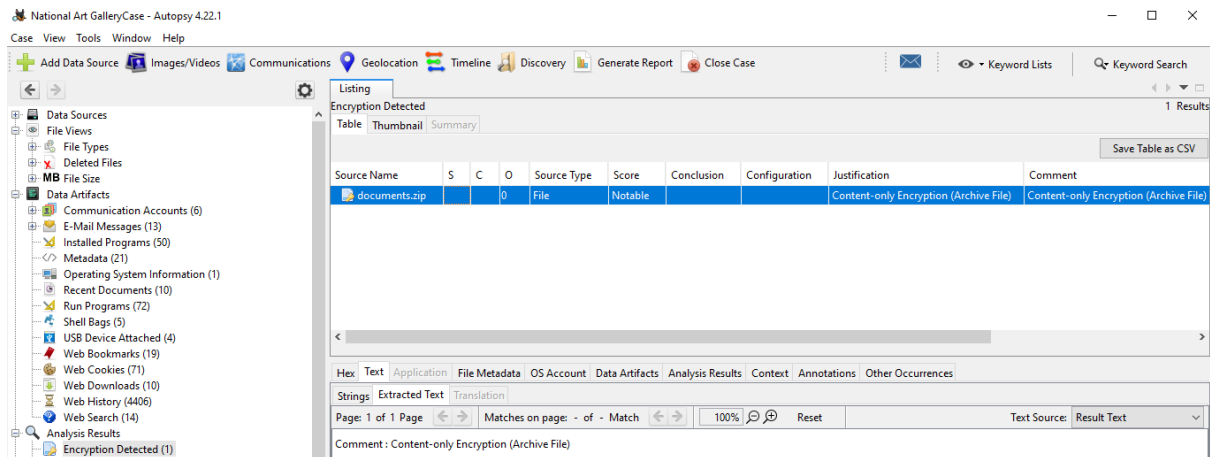

Figure 4: Encrypted zip file

The documents are detailed below:

- i. **Stamp Insurance Document 1** - This document in Figure 5 is a Memorandum of Insurance Assurance written to MylStamp Collections. It includes objects that are on loan to the National Gallery DC between 12 May 2012 and 12 May 2013. The stamp lots and the values insured are as follows:

- Lot #25 – Armed Forces Reserve: \$43,000.00
- Lot #26 – Stamp of Kazakhstan 2: \$29,000.00
- Lot #27 – Brady Co.: \$12,000.00

Figure 5: Stamp Insurance 1 pdf

- ii. **Stamp Insurance Document 2** – A second memorandum covering the same period and insurance policy (AwesomeInsurance Inc. Policy x23654) as seen in Figure 6.

The lots are as follows:

- Lot #11 – Woman's Profile: \$31,000.00
- Lot #12 – Stamp of Kazakhstan: \$29,000.00
- Lot #13 – 1929 Nepal: \$27,000.00

	NATIONAL GALLERY DC WASHINGTON	
Memorandum of Insurance Assurance:		
TO: MylStamp Collections		
In Regards to items owned or on loan to the National Gallery DC , Washington from MylStamp Collections from the period of May 12, 2012 to May 12, 2013, all items in aforementioned list will be in the custody of National Gallery DC and therefore fiscal responsibility of said items is carried by the same. As per agreement between both parties the following items are covered by AwesomeInsurance Inc. Policy x23654 for the following amounts under any circumstances leading to the degradation of said items excepting normal wear of display.		
Lot # 11. Woman's Profile		\$31,000.00
Lot # 12. Stamp of Kazakhstan		\$29,000.00
Lot# 13. 1929 Nepal		\$27,000.00
Terms do not cover period of transport from or to the National Gallery.		
		D'Mann
		
		President National Gallery DC

Figure 6: Stamp Insurance 2 pdf

- iii. **Stamp Insurance Document 3** – A third memorandum of the same period depicted in Figure 7, with the following lots:

- Lot #1 – Douglas MacArthur: \$35,000.00
- Lot #2 – Nederland: \$30,000.00
- Lot #3 – Mongolia: \$24,000.00

NATIONAL GALLERY DC
WASHINGTON

Memorandum of Insurance Assurance:

TO: MylStamp Collections

In Regards to items owned or on loan to the National Gallery of Art, Washington from MylStamp Collections from the period of May 12, 2012 to May 12, 2013, all items in aforementioned list will be in the custody of National Gallery DC and therefore fiscal responsibility of said items is carried by the same. As per agreement between both parties the following items are covered by AwesomeInsurance Inc. Policy x23654 for the following amounts under any circumstances leading to the degradation of said items excepting normal wear of display.

Lot # 1. Douglas MacArther	\$35,000.00
Lot # 2. Nederland	\$30,000.00
Lot# 3. Mongolia	\$24,000.00

Terms do not cover period of transport from or to the National Gallery.

D'Mann

President National Gallery DC

Figure 7: Stamp Insurance 3 pdf

The total insured worth of the nine stamp lots identified is \$260,000.00. It is very incriminating that Tracy had these documents, which detail the exact stamps, the lot numbers, and the actual monetary values. This is an indication that Tracy used her job at the National Gallery to get and keep insurance records so as to determine the most valuable items to steal.

Email Communications

A series of email communications were also recovered. These emails were sent between two accounts: coralbluetwo@hotmail.com (identified as Carry/Coral) and perrypatsum@yahoo.com (identified as Pat/Perry) shown in Figure 8 Another set of communications was also discovered between coralblue@yahoo.com and perrypatsum@hotmail.com indicating that both the parties were utilizing various email accounts; a trait that is indicative of an effort to avoid detection.

Figure 8: Email conversations

The most important communications identified included the following:

June 2012- Carry writes to Pat of an overseas exhibit that would be hosted at the Gallery which shows some early intelligence-gathering on what was to become the target of the plot.

28 June 2012 – In Figure 9 Pat proposes to move to new communication channels in order to be safe. Carry confirms that she is keeping track of insurance papers crossing her desk and this is a direct confirmation of the recovered insurance records and intentional sharing of information.

On 6/28/2012 12:31 PM, Perry Patsum wrote:

Coral,

Great, now that we have everything set up it would be better to do most of our communication here and on your new 'setup'. This might keep us a little bit safer. I know money is rough for both of us, so we may have to 'push the envelope' a bit.

A few friends from around the office are really good about these types of things, If I find out anything interesting I will shoot you an email. In the meantime let's try to shoot some ideas and back and forth.

Your friend,
 Perry

Perry,

I know what you mean. If anything comes up around the office that we can maybe... get in on, please lets try to do so. Kiddo is getting really bent out of shape about possibly having to switch schools. I have been paying some more attention to the memos and papers that come across my desk. We get a bunch of insurance type documents that place values on a certain objects. If anything stands out, I'll let you know.

Coral

Figure 9: New communication channels

29 June 2012 – On Figure 10 Pat admits that they were worried Internal Affairs were

keeping track of their activities, which implies that they are aware that their actions were possibly illegal.

Figure 10: Internal Affairs

2 July 2012 - Figure 11 Carry notifies Pat of a rare stamp collection to come, with unusually low shipping rates. Pat recognizes this as beneficial to their plans, which proves that both sides regarded it as a theft opportunity.

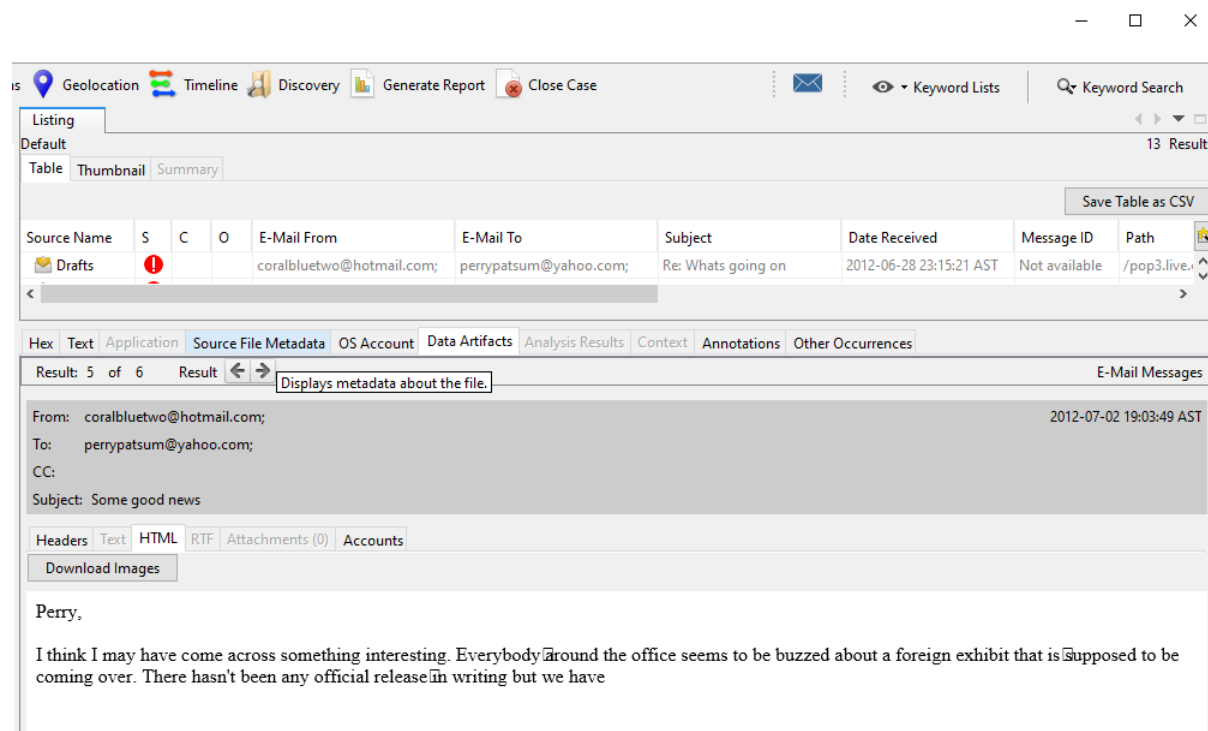

Figure 11: Rare stamp collection

Something for you - Figure 12 Carry emails Pat, attaching documents, which are password-protected with her old dog's name. This directly connects to the encrypted ZIP file and confirms that Carry sent the insurance documents to Pat.

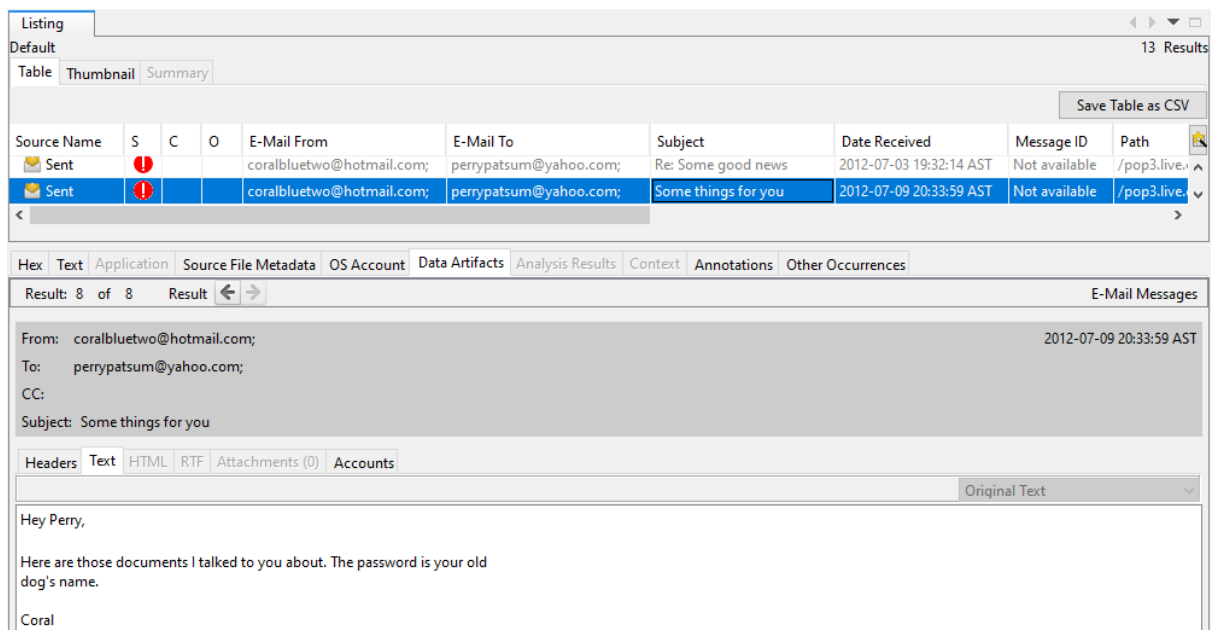

Figure 12: Encrypted documents

Timeline of Events

Date	Event
June 2012	Carry begins communicating with Pat about the foreign exhibit. Tracy starts monitoring insurance documents crossing her desk.
28 Jun 2012	Pat and Carry discuss switching to alternative communication channels and the plan to exploit the gallery event. Tracy confirms she is watching insurance documents.
29 Jun 2012	Pat expresses concern about IA monitoring. Carry urges caution.
2 Jul 2012	Carry informs Pat about an incoming rare stamp collection. Both identify it as a potential theft opportunity.
5 Jul 2012 21:43	Web search conducted for the value of international stamps in 2012.
July 2012	Tracy sends encrypted ZIP file containing stamp insurance documents to Pat. Password communicated via email.
16 Jul 2012	Forensic image of Tracy's external hard drive acquired (tracy-external-2012-07-16-final.E01).

4 Conclusion

According to the forensic analysis of the external hard drive of Tracy, there is a lot of digital evidence to prove that Tracy was an active participant in a conspiracy to steal valuable stamp collections in the national gallery DC.

The web search history confirms that Tracy was doing research on international stamp values in July 2012, which is in line with planning the theft. The fact that the security rotation schedule was recovered on her personal device implies that she had access to sensitive operation information that was not within the area of her legitimate authority. The encrypted file of three insurance documents, which sums to insured values of \$260,000, confirms that Tracy had determined the most valuable stamp lots and was hiding this information. The email messages confirm that she was relaying this intelligence to Pat with whom she was conspiring.

The communications also demonstrate a strong understanding of the danger of being caught as there is a mention of the Internal Affairs and the utilization of numerous email accounts. These artefacts are directly linked to a pattern of criminal conspiracy by the password-protected transmission of insurance documents.

In conclusion, the forensic investigator believes that Tracy used her privileged status at the National Gallery to amass and deliver intelligence to enable her to steal, and the recovered evidence supports this finding.

5 Recommendations

Following the results of this forensic examination, the following recommendations are offered:

- The National Gallery ought to adopt stringent measures in the access of sensitive operation records such as insurance valuations and security schedules to ensure that employees do not carry copies of such records in their personal devices.
- Regular auditing of the online activity of the staff with the privileged access to security and financial documentation should be conducted.
- The Gallery must also consider the practice of encrypting sensitive documents when they are at rest so that only authorised personnel who have a legitimate need to access them can do so.
- It is advisable that additional forensic analysis of the tablet and phone used by Carry and the devices used by Pat be conducted to form an entire picture of the conspiracy.

Appendix I

Summary of Evidence

#	Evidence Item	Significance
1	Web search – value of international stamps (5 Jul 2012, 21:43)	Shows Tracy researching stamp values prior to theft conspiracy
2	Security Rotation Schedule document	Sensitive security shift information stored on personal device
3	Encrypted ZIP file ('document') containing 3 insurance PDFs	Concealed insurance valuations totalling \$260,000 for 9 stamp lots
4	Email chain between coralbluetwo@hotmail.com and perrypatsum@yahoo.com	Establishes conspiracy to steal stamps and coordination between Tracy and Pat
5	Email: 'Something for you' with encrypted attachment	Links encrypted archive to Pat; password shared covertly
6	Email referencing 'rare stamp collection' arrival (2 Jul 2012)	Confirms stamp theft was actively planned around the incoming exhibit
